AkzoNobel

1 Code-System

For example: **AqualitColor AC-T450-30-BW01**

Aqualit = name of product technology

Color = this is added to the name, if it is a pigmented product (not added, if it is a clear product)

AC = short code for AqualitColor

T = top coat (see all codes at the bottom of the page: product type)

450 = product number

100 Sealer, clear	6000 Hardener
200 Top coat, clear	9000 Thinner
300 Primer, pigmented	
400 Top coat, pigmented	

30 = gloss level (60°)

BW01 = base white (base color for mixing machine; can also be a number of a ready mixed color e.g. RAL9010)

2 Product technology

PU Acrylic	Quantum QuantumColor
PU Alkyd	Solido SolidoColor
Nitro	Easyfit EasyfitColor
Polyester	Polydur PolydurColor
Acid Curing	Duracid DuracidColor
Waterborne	Aqualit AqualitColor
Oil & Wax	Nature NatureColor
Additional products	Hardener, Thinner, Additives

3 Product type

Sealer (S)	Insulating sealer (IS)	Thinner (T)
Top coat (T)	Parquet top coat (PT)	Hardener (H)
Primer (P)	Insulating primer (IP)	Filler
Patinas		Oil (O)
Stains		Wax (W)
Additives		

4 Product description

Product description in English. Local languages will be on top of the safety sentences.

5 Paint technology

	Solventborne
	Waterborne
	Based on natural ingredients only

6 Product preparation

	Mixing ratio 2 component (hardener)
	Thinner
