

Revolutionary & formaldehyde-free

Duracid und DuracidColor FF

Wood Coatings
Passion for wood

The new coating system meets the highest quality standards

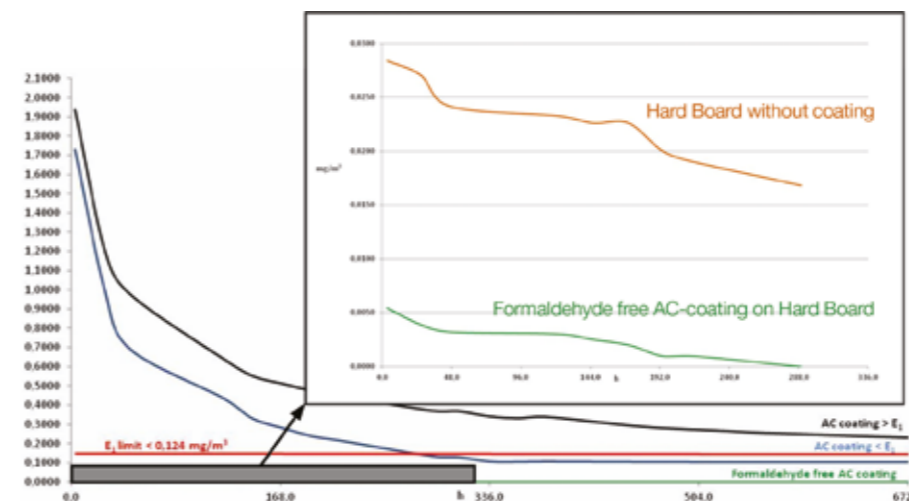

Duracid and DuracidColor FF products are completely free of formaldehyde and isocyanates. Thus, the system is safe to use on furnishings e.g. in living rooms, bed rooms and children's rooms. The paints have the same good properties as our high-quality 2-component PUR alkyd paints or the traditional acid-hardening paints.

The FF coating system can be perfectly applied with a spray gun and has an extremely long pot life of 5 days. All system components are compatible and 100% matched. Duracid FF and DuracidColor FF products have excellent adhesion to all woods as well as UV primed surfaces.

Drying, viscosity and gloss properties can be easily adjusted with various additives depending on the hand-worker's needs or the industrial application.

Formaldehyde Emission Test: EN717-1
