- ↗ PU Acrylic
- ↗ PU Alkyd
- ↗ Nitrocellulose
- ↗ Polyester
- ↗ Acid curing
- ↗ Waterborne
- ↗ Oil & Wax
- ↗ Additional products

The screenshot shows the 'Wood Coatings' section of the AkzoNobel website. The navigation menu includes 'About us', 'Products' (highlighted with a red box), 'Downloads', 'News', and 'Login'. Below the menu, the breadcrumb trail reads 'Home > Products'. The main heading is 'Our Interior Product Portfolio'. The portfolio is organized into four rows, each featuring a small image of an interior space and a text description:

- PU Acrylic:** Acrylic-based polyurethane coatings (PU) are chemically curing solvent-based coatings, in which two raw material groups (hardeners and binders) react with one another. When completely cured, PU acrylic coatings form insoluble, extremely...
- PU Alkyd:** (Image of a modern kitchen)
- Nitrocellulose:** (Image of a retail store)
- Polyester:** (Image of a bathroom)

By clicking on the **Downloads** button on the menu bar you can access and download brochures, guides, leaflets, test standards and certificates.

Downloads

You can download all the important information about our products here. All the technical data sheets and test certificates are available as easy downloads. You can also download all the AkzoNobel Wood Coatings leaflets and guides.

Test standards and certificates

Test standards are very important for products used for coatings. Test standards evidence the quality and particular properties of the certified products and therefore ensure the necessary safety. The occasionally high demands (chemical demands,...

Leaflets and guides

AkzoNobel Wood Coatings offers you a variety of interesting brochures and guides, which will give you all the important information about our products and valuable tips and information about surface treatment...
